ELV CAT DE-Canner:

Item No: 1882

The new ELV CAT De Canner extract the maximum pay back on End of Life vehicle catalytic converters.

A simple vertical shearing action cuts the scrap catalytic converters in half allowing the valuable inner Monolith which contains the precious metals to be liberated which is then simply decamped in to a 205 litre drum ready for evaluation and further processing.

The new ELV CAT De Canner's are equipped with a powerful air extraction system with HEPA filter to ensure safe operation and complete precious material extraction.

The new ELV CAT De Canner's are simple and safe to use and give on average a 25% - 30% increase on revenue return from scrap catalytic converters from your ELV's.

PRICE: £ POA + VAT ex works UK
