The McIntyre Big Foot Metal Baler

Market Leader!

Developed specifically to meet the needs of the modern metal processor, the McIntyre 5025 Big Foot Universal Metal Baler offers more power and more shear force than any other baler of its type.

Powerful!

Cutting edges on three sides of the loading box and lid give the Big Foot the ability to handle oversized material. With a lid-ram shear force of over a hundred tonnes, the front edge blade is not just for show, but has real cutting capacity. This large shear force, coupled with a main-ram compression force of 80 tonnes enables the Big Foot to efficiently handle a wide variety of ferrous and non ferrous materials.

Strong!

The Big Foot is rugged enough to withstand the forces it is expected to apply to the infeed material! Long-life wear plates line a baling box manufactured in mild steel some 60mm (2 3/8") thick. Return-line filters reduce wear and tear on hydraulic components and a like fail-safe mechanism prevents accidental damage to the main ram rod. All ram rods are hard-chromed for maximum seal life.

Cost Effective!

The combined features of the McIntyre Big Foot allow the metal processor to successfully shear and bale material on one piece of equipment. Oversized sheets and sections can be handled with ease, freeing previously occupied labour and machinery, and in many cases eliminating the need for expensive cutting equipment.

Technical Data

Dry Cycle	37 seconds
Bale Size	500mm x 250mm (20" x 10") x variable
Compression Force	
- Shearing Force	123 tonnes
- Horizontal ram	80 tonnes
Twin Motors	15Hp, 11kW
Weight	5500kg
Working Pressure	2250PSI (153Bar)
Loading Box	
- Length	1220mm (48")
- Width	500mm (20")
- Depth	500mm (20")
Overall	
-Length	3950mm(13'0")
-Height	1930mm (6'4")
-Width	860mm (2'10")
Table Height	790mm (2'7")
Hydraulic Oil	ISO46

Other Models
